Adding User Accounts Surevision

Sometimes you'll need accounts for people who you don't want full system access for. In this guide we will show you how to add users to your system.

First, right click on your screen with your cameras, in the dropdown select **Menu**. On the Menu select the **System** tab on the left then the **User** subtab. The menu you should be on will look

Left Click Add on the bottom left corner.

After clicking Add a box will appear. From here enter the new user's Username, Password, and then Confirm the Password.

Once done if you want to make it easier for you user to login at the machine, **check** the **check box** that says **Enable Unlock Pattern**. This will make a pattern appear on the login for this user on the local system.

					System			1	
		User							
Camera					Modify/Add User				
S. va ₩	Preview Time POS Serial		Username User Type Password Confirm		Operator v				
Network			Pattern Note: If NVR is addec platform, Racir Permissions	defeation union of the password on the password on the union of the password on the password on the password on the union of the password on the union of the password on the p		vord on the			
D Backup			Configure Smart Permissions Smart Preview	Upgrade	View and Export L 🖬 R	lestart			
Storage			Camera Permission Select Permission Live View		Select Camera				
Alarm			PTZ Control Playback Manuai Recording on NVR		202 203 204				
Maintain					OK	Cancel			

After you set the password information you can choose from here which permissions you want the user to have. After you are satisfied with their permissions hit **OK**. This **User** is now setup and can login to the system with the login information created. You can also use this account for permissions when sharing your device with your user via the Surevision App.
