

Setting Up SmartPSS

Locate the SN of your NVR or DVR. They can be found in the following locations.

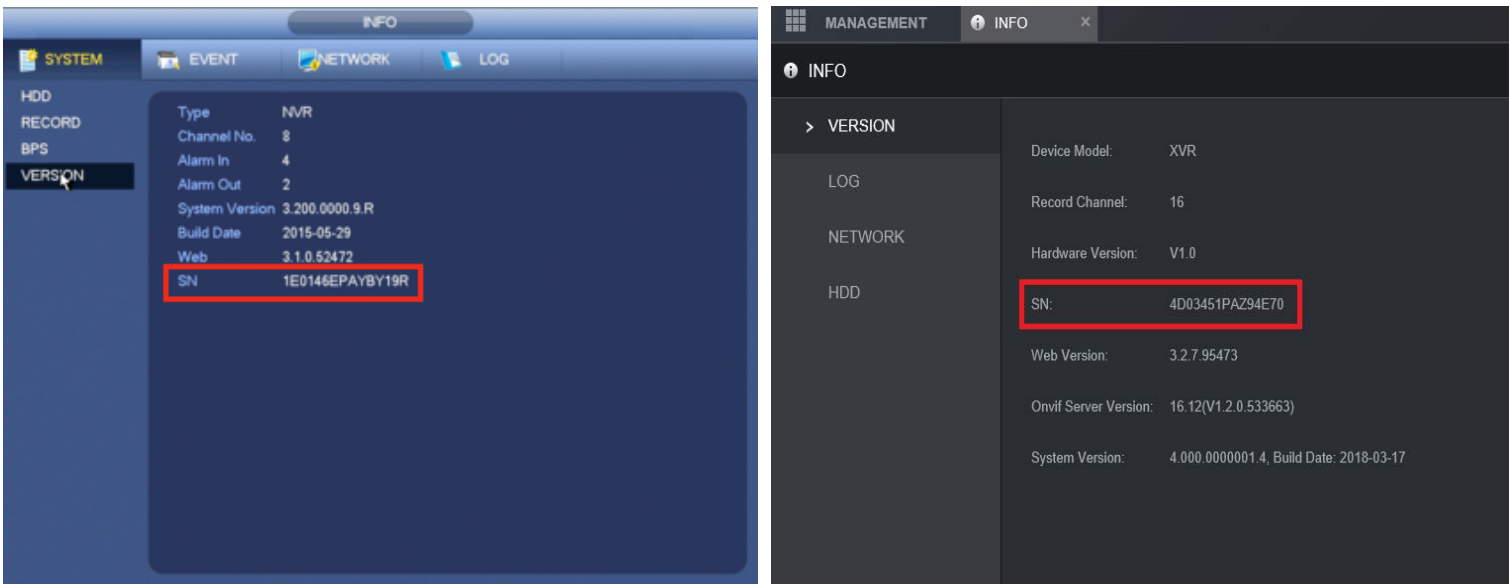

On the underside or side of the unit

Inside the Network Settings of your NVR or DVR

Or in the Info section inside of the Version menu

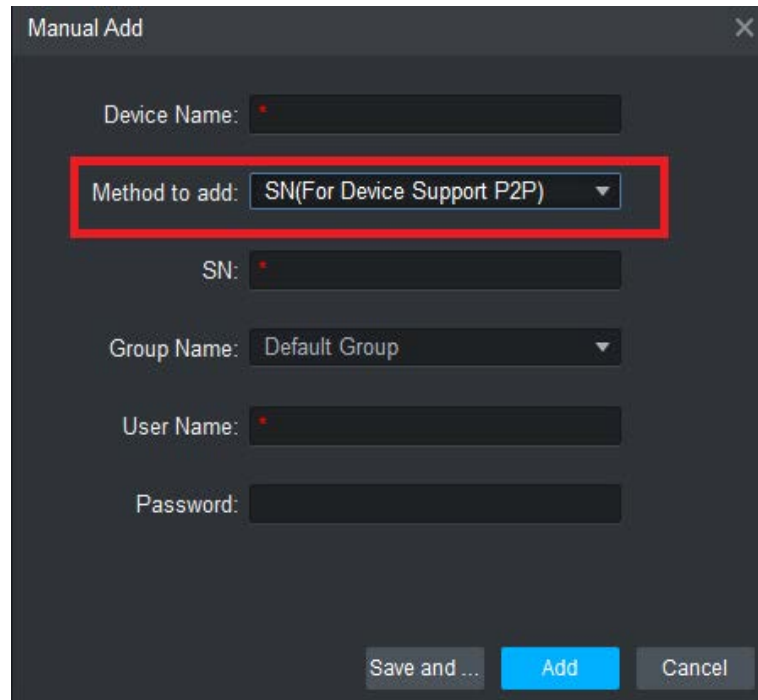

Once you have located your Serial Number (SN) we can now configure SmartPSS.
Launch SmartPSS from the Icon on your desktop.

Once SmartPSS is running click on "Devices" and "Add". We will now add the device information into SmartPSS

Change the "Method to add" to SN

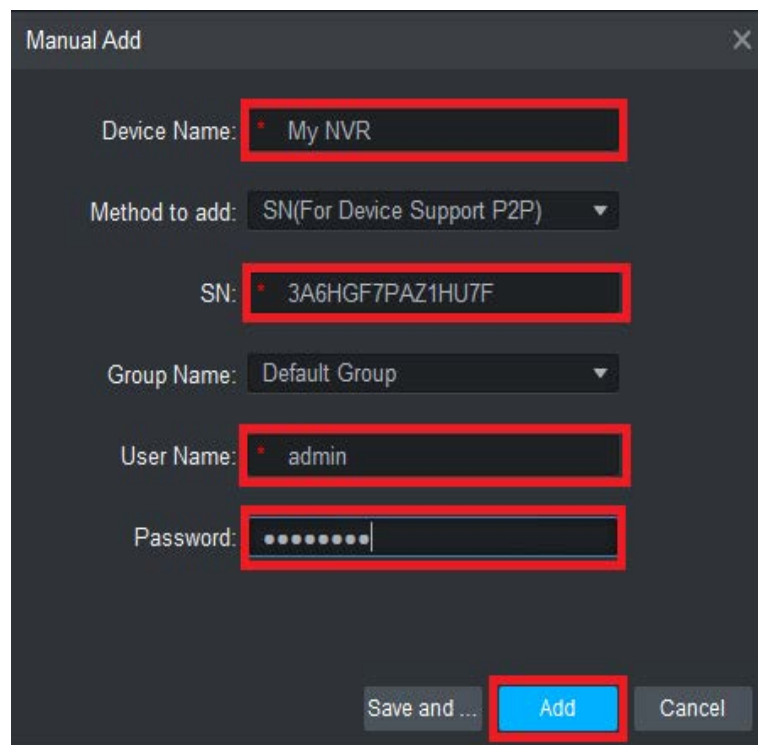

The screenshot shows a 'Manual Add' dialog box with the following fields: 'Device Name' (empty), 'Method to add' (set to 'SN(For Device Support P2P)' and highlighted with a red box), 'SN' (empty), 'Group Name' (set to 'Default Group'), 'User Name' (empty), and 'Password' (empty). At the bottom are buttons for 'Save and ...', 'Add', and 'Cancel'.

Enter in a Device name for your NVR or DVR. This device name can be named anything and is a required field. Enter in your NVR or DVR Serial number found earlier in this guide. Enter your Username and Password for your NVR or DVR.

****Note:** The Serial Number contains the number Zero. Never the Letter "O"

*****Note:** The Username and Password is Case Sensitive!

Click Add to finish.

The screenshot shows the 'Manual Add' dialog box with the following fields filled: 'Device Name' (My NVR), 'Method to add' (SN(For Device Support P2P)), 'SN' (3A6HGF7PAZ1HU7F), 'Group Name' (Default Group), 'User Name' (admin), and 'Password' (represented by dots). The 'Add' button at the bottom is highlighted with a red box.

If all of your information was entered correctly you will see an Online Status appear after a few moments.

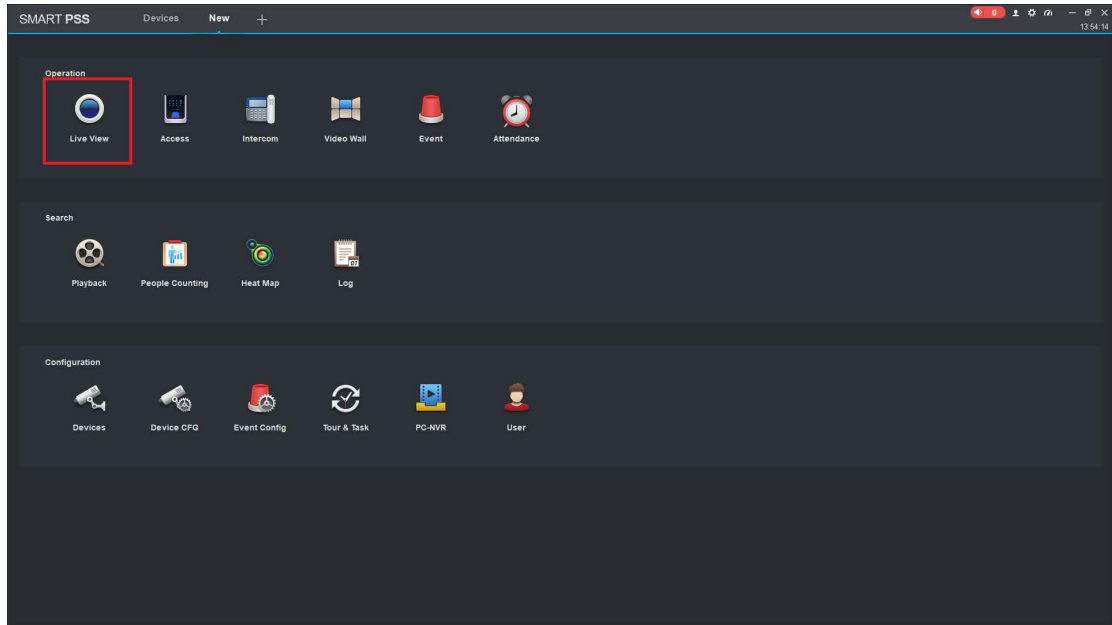

Please see our guides for [Accessing the Live View](#) and [Playback](#) for more instructions.

Using SmartPSS

Upon logging into **SmartPSS** you will find the **Home Page**. This is where you will find all of the functions of SmartPSS.

To View your cameras on SmartPSS click on the Live View Icon

Inside of **Live View** you will want to navigate to the left hand side of your **Device List** to find added **Devices**. If you **Double Click** on the **Device** you want to view (In this case My NVR), SmartPSS will automatically open your cameras.

Double clicking opens up our first 4 cameras.

Since our recorder is capable of 16 cameras we want to change the view type at the bottom of the screen.

You can **Double Click** on a single camera to full screen. You can also select the different view types at the bottom of the screen (**1, 4, 6, 8, 9, 16, 25, 36, 64 Split Screens**)

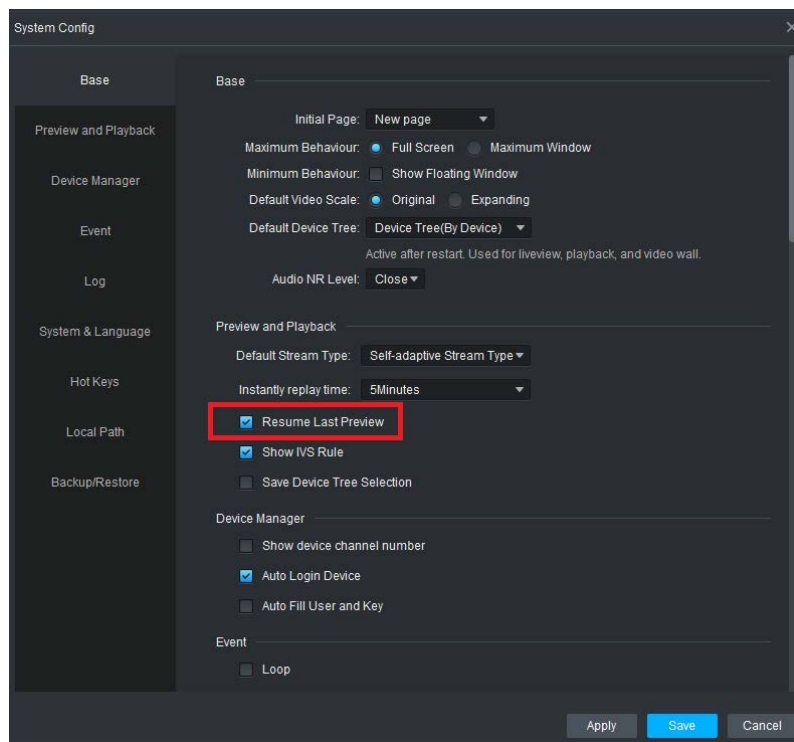

Alter the windows using this menu at the bottom right hand corner of SmartPSS

If you would like **SmartPSS** to automatically open up your cameras when opening the **Live View** go to the **Settings** icon found in the top right corner of the **Home Page**.

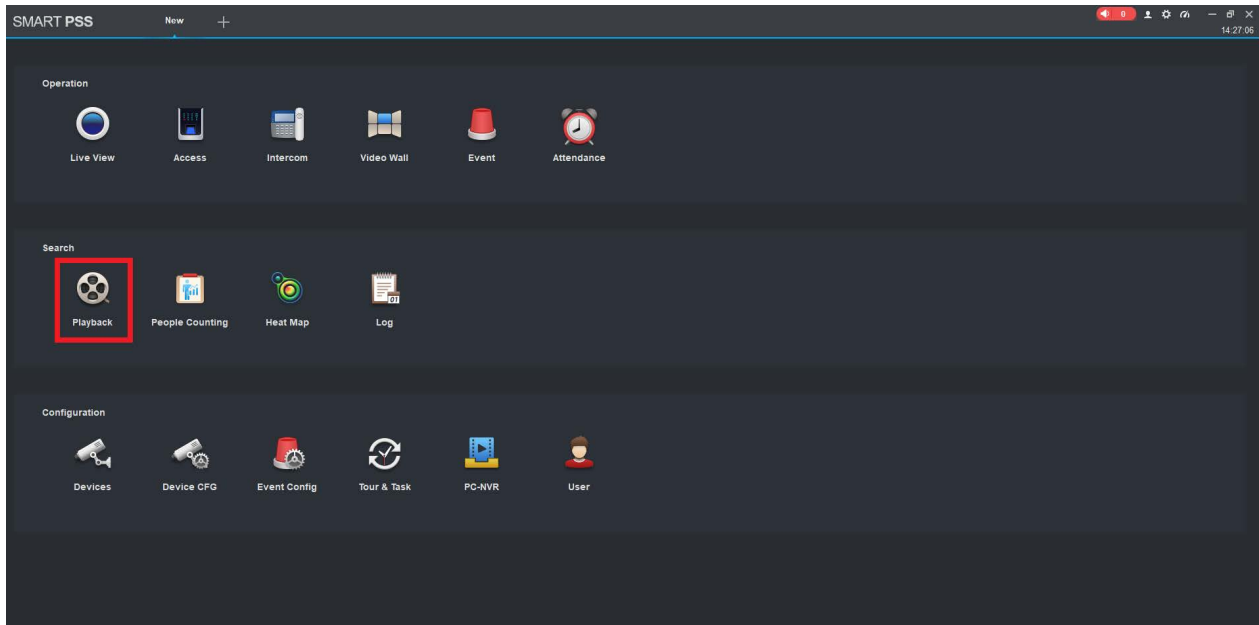

Check the box next to **Resume Last Preview**. When you open **SmartPSS** after shutting down, SmartPSS will automatically run the last configuration in **Live View**.

Using SmartPSS – Playback

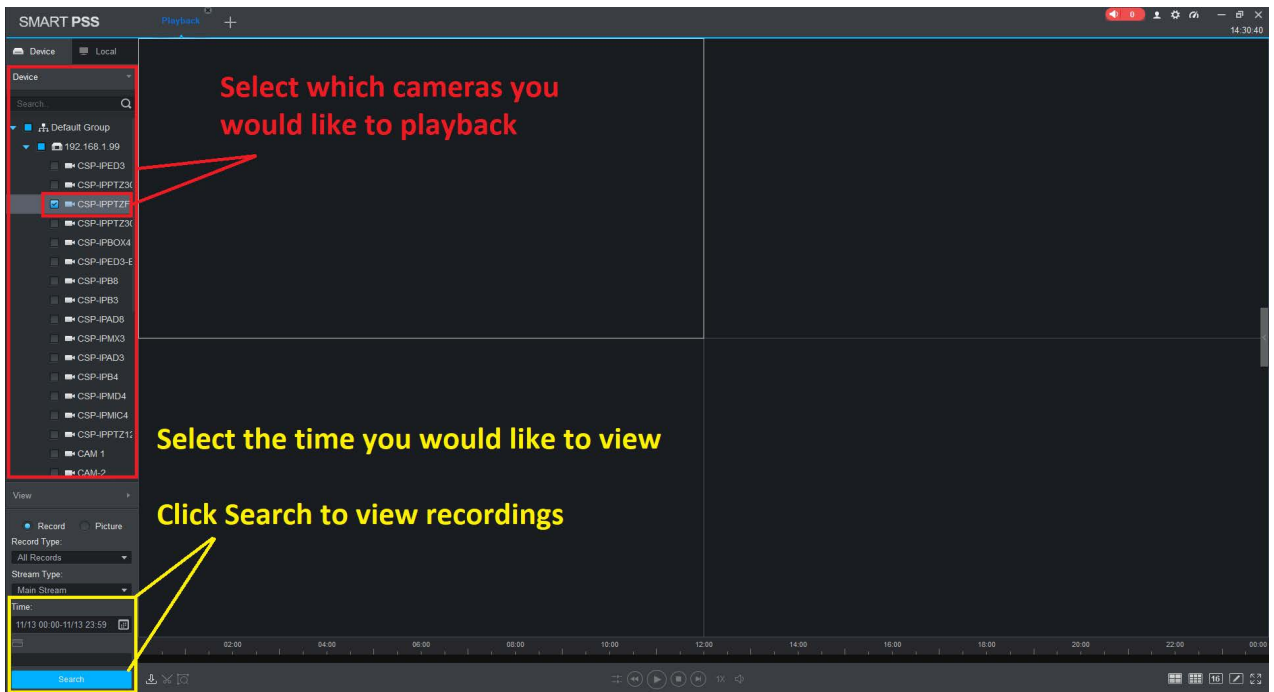

To watch the **Playback** of your Camera System. Select **Playback**.

Inside of the Playback Menu you need to:

1. Select Device you would like to watch Playback video.
2. Select camera from Device List to watch Playback Video
3. Enter Time Frame of your Search Parameters
4. Click Search.

Note* Your Search Parameters must not exceed 1 day or 24 hours.

After Clicking **Search** you will see recorded video in the **Time Line** below.

Note*

Green Bars: Regular 24/7 Recording
Yellow Bars: Motion Detection Recording.

Once you have searched for your recording you can Click the Play button to begin playing video back.

Use the Playback functions to assist in watching the Playback Footage.
